WORK EXPERIENCE

Avalara

Nov. 2016 - Jun. 2024

Senior Software Engineer | Jan. 2022 - Jun. 2024

Seattle, WA

Avalara is a provider of tax compliance automation software for businesses, offering solutions in a SAAS environment.

- Upon promotion to Senior level, maintained duties of Software Engineer role plus the following:
- Led a team of 7 globally dispersed software engineers as Scrum/Team Leader, utilizing Agile methodologies to reduce sprint rollover by 20%.
- Triaged and monitored Jira ticket backlog, reducing escalations and reassignments by 25%.
- Facilitated the sharing of progress updates and resolved blockers during weekly cross-team meetings to keep projects on track.
- Trained 5 engineers from diverse backgrounds in all aspects of the software development life cycle, boosting team productivity by 15%.

Software Engineer | Nov. 2016 - Jan. 2022

Seattle, WA

- Designed and maintained scalable code for web applications, Microservices, and RESTful APIs utilizing C#, JavaScript, SQL Server, Snowflake, and AWS.
- Thoroughly involved at every level of the SDLC, ensuring quality and timely deliverables across multiple projects.
- Developed data-driven solutions to enhance automation on 40 products, improving automation by up to 50%.
- Optimized 3 internal products through a personal project that gained 35% in automation, stopping a compliance team of 5 from working a weekend every quarter of the year.
- Reduced data discrepancy hotfixes by 20% through Python scripting and data comparisons.
- Refactored legacy C# codebase for several customer-facing web applications, reducing page load times by 30%.
- Utilized UX/UI principles to provide Power BI dashboards tailored to non-technical stakeholders, automating previously manual data retrieval processes.
